Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 11, "second end of the tubular device is disposed proximate the second branch" is ambiguous in view of the elected embodiment shown in figure 6c and applicant's specification page 8, lines 5 et seq. describing the second end engages the main passage.

Claim 11 is indefinite. Claim 11 claims, "the tubular member comprises a lumen having a substantially uniform diameter" which directly conflicts with claim 7 claiming, "a tubular device comprising a narrow region". Also note that tubular member lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Deem et al (2001/0037808).

Referring to figure 2, Deem et al teaches implanting a tubular device 34 in first branch. Deem et al further teaches numerous embodiments such as figure 14, 34 and 38 wherein said device comprises a narrow region at a proximal end (second end) which is disposed proximate the second branch as shown in figure 2. Inherently, air exiting the lung passing through said device would increase velocity through the narrow region into the main passage and induce a vacuum proximate the second branch.

Allowable Subject Matter

Claim 9-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 1-6 are allowed.
